Satish Nivrutti Sonawane

Senior Software Engineer 2 | Swift & Native iOS application development
satishsonawane90@gmail.com|9096428822|/satish-sonawane-151a0b107/|Current location: Pune.

Summary

Senior Software Engineer 2 with **10 years 2 months of Native iOS Development experience** across media, reservations, staffing, and social applications. Implemented **VIOC API integration** for an iOS 26 application using SwiftUI and native iOS frameworks, Swift Package Manager, advancing mobile modernization. Develops Native iOS applications with **Swift, Swift Concurrency, UIKit, SwiftUI, REST APIs, Clean Architecture, XCTest, and XCUITest**, while applying reusable components, debugging, and testing practices. Experienced with **GitHub and Azure DevOps** for source control, pull requests, code collaboration, CI/CD workflows, automated builds and testing, and application delivery.

Work Experience

Senior Software Engineer 2, Photon Interactives Pvt. Ltd.
Pune, India Jul 2025 - Dec 2025

- Developed Native iOS applications during a 5-month role, applying iOS development practices to maintain mobile application functionality.
- Implemented Swift-based iOS features with Swift Concurrency and reusable components to support maintainable application delivery.
- Improved application reliability through XCUITest testing and debugging practices during the role.

Tech lead iOS Developer, Prosper Infotech llc
Pune, India Nov 2022 - May 2025

- Led Native iOS Development for 2 years 6 months, applying Clean Architecture and Swift Concurrency to support maintainable application delivery in a team lead role.
- Developed reusable iOS components to support consistent mobile application implementation.
- Established XCUITest coverage alongside code review and release coordination practices to improve team delivery consistency.

Sr. iOS developer, Coffee Fuelled pvt ltd
Navi Mumbai, India Jan 2020 - Aug 2022

- Developed native iOS applications for 2 years 7 months as a senior iOS developer.
- Implemented mobile application features with Swift, Swift Concurrency, and native iOS frameworks across product work.
- Resolved application issues through XCUITest, debugging, and structured testing to support maintainable releases.
-

Team Lead iOS developer, Eeshana Solution Pvt. Ltd
Pune, India Oct 2015 - Jun 2018

- Led Native iOS Development for 2 years 8 months, guiding mobile application implementation as a team lead.

- Developed reusable iOS components with Swift Concurrency to support consistent application interfaces and maintainable delivery.
- Improved engineering consistency through XCUITest, code reviews, and adherence to Apple development guidelines.
-

jr.iOS Developer, N-gage marketing Pvt.Ltd
Mumbai, India Jun 2015 - Oct 2015

- Developed iOS applications during a 4-month junior developer role, building foundational native mobile development experience.
- Implemented application features with Swift Concurrency and reusable components to support consistent iOS delivery.
- Resolved defects through XCUITest, debugging, and testing while building practical iOS development skills

---

Projects

Landmark PhotoBoth
- Led feature modernization for an event-management application by migrating modules to MVVM in Swift and Xcode.
- Enhanced photo and video capture, editing, and sharing workflows with Cocoa Touch, CIImage, and Core Data.

Construction cloud
- Engineered camera capabilities for a construction-site application, handling image-picking and video-recording orientation across mobile workflows.
- Designed responsive camera and video interfaces with Objective-C, Xcode, and Cocoa Touch for posts containing images, video, or text.

Combatshot
- Implemented application APIs for a social posting platform using Objective-C, Xcode, and native iOS frameworks.
- Developed feed and camera functionality for image, video, and text posts while supporting the application's iAd experience.

Taj Hotels Resorts and Palaces
- Developed hotel and room reservation interfaces for the Taj Hotels application using Swift 3.0, Xcode, and Cocoa Touch.
- Implemented reservation functionality, interface animations, API integration, and local data handling with Core Data.

RawRecruit
- Built athlete and coach workflows for a sports recruitment application using Swift, Xcode, Cocoa Touch, and API integration.
- Implemented metric selection and management across two user categories—Coach and Athlete—using Core Data for local persistence.

N-gage
- Developed social messaging interfaces in Objective-C, Cocoa Touch, Xcode, and Core Data for chat, groups, image sharing, and location sharing.
- Designed a QR code scanner module and refined message views to support reliable media-sharing interactions.

Street Delight
- Developed location-based entertainment interfaces in Swift with MapKit, CoreLocation, Xcode, and native iOS frameworks.
- Integrated REST APIs for restrooms, parking lots, and heat maps, connecting location data with responsive mobile interfaces.

BonBon

- Designed camera interfaces for a shopping marketplace in Swift and Xcode, supporting product photography and video presentation.
- Implemented camera orientation handling for image and video views alongside payment gateway and API integrations.

vSlice

- Built feed, profile, camera, and messaging interfaces for a media application using Swift, Cocoa Touch, Xcode, and Core Animation.
- Implemented API integrations and feed management for varied uploads, friend requests, chat, and profile interactions.

Pebble AgeUK(Coffee Fuelled)

- Developed the staffing application's employee, leave, and expense workflows in Swift using Cocoa Touch, Xcode, and Core Data.
- Delivered the application UI and API integrations while adding animation to employee-management and administrative experiences.

PPU Photos

- Engineered a photo-editing and GIF-creation application with SwiftUI, Xcode, CIImage, Combine, and AVFoundation.
- Built the photo model and camera functionality to support image manipulation and media creation workflows.

VIOC(VOLVOLINE INSTANT OIL CHANGE)

- Implemented Apple's Direct Age Range API integration for smartphone child-parent usage monitoring with SwiftUI.
- Built the complete API integration for the iOS 26 application using native iOS frameworks and modern SwiftUI interfaces.

Education

MCA (Engg.) , NDMVP's KBTCOE Nashik
Distinction, Nashik, India — Jan 2015 - Dec 2015
Distinction (2015)

BCA , KKVN College Nashik
First Class, Nashik, India — Jan 2013 - Dec 2013
First Class (2013)

Class XII , BKKV Jr.college,Dindori, Nashik
Higher Second, Dindori, India — Jan 2008 - Dec 2008
Higher Second (2008)

Class X , BKKV High school,Dindori, Nashik
First Class, Dindori, India — Jan 2006 - Dec 2006
First Class (2006)

Skills

- **iOS Development:** Native iOS Development, Native iOS application development, iOS SDK, iOS lifecycle, Native iOS frameworks, Swift, UIKit, SwiftUI, Auto Layout, Storyboards/XIBs, Programmatic UI, Navigation, Responsive mobile interfaces, Reusable components, Apple development guidelines
- **Networking, Data & Concurrency:** REST APIs, JSON, URLSession, networking frameworks, Core Data, UserDefaults, Keychain, async/await, GCD, OperationQueue, Common libraries, Third-party services
- **Testing & Engineering Practices:** Git, Debugging, Performance optimization, Unit testing, UI testing, Integration testing, Code reviews, Branching/release processes
- **Additional Skills:** Objective C, AI Generalist, MS Access, My SQL, SQL, Xcode.
